

# ELIMINATE WAXED CORRUGATED BOXES WITH POLYPROPYLENE PLASTIC BOXES

**INTRODUCING** A COMPLETE LINE OF AGRICULTURAL BOXES  
MADE FROM FLUTED POLYPROPYLENE RESIN

**STRONG**—Plastic corrugated boxes are impervious to moisture or humidity. They do not lose their integrity or stacking strength when hydro cooled.

**INCREASE EXPORTS**—Plastic boxes are ideally suited for international exports to countries where waxed corrugated is not encouraged or allowed.

**TAILORED DESIGNS**—TCC can tailor its plastic box technology specifically to your produce's needs. We offer two color flexographic printing on any GCM1 color resin.

**PROPRIETARY, MASS  
PRODUCTION TECHNOLOGY**

**MADE IN THE USA**—TCC is a vertically integrated, domestic manufacturer located in Desoto, Texas. We extrude our own material into sheet and then convert that sheet into your finished boxes.

**QUALITY**—TCC is a high quality manufacturer. Some of the world's leading companies rely on TCC for their packaging needs. TCC is a global supplier of both agricultural and reusable, distribution boxes.
